

EMANUEL F. DOMOOS

PROGRAMMER

I am a recent graduate with a Bachelor of Science in Information Technology from the University of Cabuyao (UC), actively seeking an entry-level position as a web developer. I am highly motivated to gain hands-on experience, strengthen my technical skills, and contribute to collaborative team projects. With a strong desire to learn and grow, I am committed to building a solid foundation in software development and making meaningful contributions to innovative digital solutions.

SKILLS

- Web Development: Knowledgeable in HTML, CSS, and JavaScript, with experience in React, Node.js, Express, and MySQL for building full-stack web applications.
- Version Control: Familiar with Git and GitHub, including team collaboration workflows, branching strategies, and pull request management.
- Productivity Tools: Skilled in Microsoft Office Suite (Word, Excel, PowerPoint) for documentation, data analysis, and presentations.
- AI Tools: Exploring AI platforms such as ChatGPT, Claude, and DeepSeek to assist with coding, debugging, research, and productivity.

EDUCATION

BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY

University of Cabuyao (UC)

2021 - 2025

EXPERIENCE

RESEARCH LEAD / BACKEND DEVELOPER

2024

Capstone Project – Enhancing the Efficiency of School Canteen Operations: Implementing an Advanced Ordering Solution

- Collaborated with a team to develop a web-based ordering system to streamline school canteen operations for Saint Jerome Integrated School of Cabuyao.
- Integrated cashless payment methods such as GCash and Maya using the PayMongo API.
- Implemented inventory management and automated sales reporting to support accurate stock tracking and performance analysis.

IT INTERN / BACKEND DEVELOPER

2025

DepEd Cabuyao – Development of Ticketing and Account Request System

- Collaborated with a team to develop a web-based system (ticketing.sdocabuyao.com) that automates ticketing and DepEd account request processes.
- Designed and implemented the backend infrastructure, including secure API endpoints, database schema, and role-based access control.
